Messrs. [REDACTED] CONTACTED Mr. Owen Gretton, BUREAU OF THE CENSUS, REGARDING POSSIBLE CENSUS WORK IN SUPPORT OF A PROGRAM TO COMPUTE "INPUT FACTORS" FOR SELECTED CATEGORIES OF US MANUFACTURERS. Disclosure of data on individual manufacturing facilities is forbidden by law; however, combinations of plants (3 or more per group) can be synthesized by IBM computing runs, and some input data obtained. Mr. [REDACTED] URGED THAT the HARE MINIMUM REQUIREMENTS of material which could be thus obtained BE REQUESTED, in view of the fact that (a) Census and CIA must work out an appropriation schedule and (b) the IBM facilities are now being strained: this will also cause considerable delay in processing even "minimum" requirements. Mr. Gretton was helpful in suggesting names of other persons who have done work in this field. In particular, he mentioned the work of the Bureau of Labor Statistics which, it is intended, will be reviewed in the near future. (1 hr) (5 Sept)
